Staff Engineer — Frontend

- Built Talos — full agentic chat web app on the claude-code-typescript SDK, with artifact generation, design mode, and live previews.
- Drove the Axiamatic UI perf program — ~60% faster overall: FCP 4.1s → 0.8s, LCP 5.6s → 2.1s, DOMContentLoaded 4s → 340ms.
- Fixed memory leaks in long-lived Talos sessions — heap 2.5 GB → 1.3 GB (-50%), external buffers 483 MB → 167 MB (-65%); ended OOM-triggered restarts.
- Designed the Axm Design System MCP — wired in as an LLM-callable skill so Talos artifacts ship on-brand on the first try.
- Mentored a team of 5+ engineers — fostered technical excellence, scalability awareness, and AI-augmented frontend craft.
