Address

Bangalore,
Karnataka, India

Profile

Staff Engineer with 11+ years building scalable web platforms and AI-native products — spanning architecture, design systems, real-time UIs, and frontend performance. Currently leading Talos at Axiamatic: an agentic chat workspace with artifact generation, design mode, and live previews, shipping in every tenant.

Work Experience

Nov 2022 — Present
Axiamatic
Bangalore

Staff Engineer — Frontend

- Built Talos — an agentic chat workspace on the claude-code-typescript SDK, with artifact generation, design mode, and live previews; shipping in every Axiamatic customer workspace as a micro-frontend.
- Drove the Axiamatic UI perf program — ~60% faster overall: FCP 4.1s → 0.8s, LCP 5.6s → 2.1s, DOMContentLoaded 4s → 340ms.
- Fixed memory leaks in long-lived Talos sessions (up to 90 minutes of continuous agentic work) — heap 2.5 GB → 1.3 GB (-50%), external buffers 483 MB → 167 MB (-65%); ended OOM-triggered restarts.
- Designed the Axm Design System MCP — exposed as an LLM-callable skill so Talos artifacts render on-brand by default.
- Led frontend architecture, code reviews, and design-pattern work day-to-day — continuously refined the tech stack and mentored 5+ engineers.

Jan 2017 — Nov 2022
Media.Net (Directi)
Bangalore

Senior Web Application Developer — Module Lead

- Built the Pub Ad-Quality dashboard on React, Redux Toolkit, Styled Components, and Grommet — full multi-theming from day one; a publisher-facing tool inside one of the open web's largest SSPs (15+ years, publishers like TIME and U.S. News).
- Led a Next.js migration — matched SSG, ISR, and SSR to each page's render and data profile.
- Drove the CWV program: FCP 5.1s → 0.2s, LCP 13.7s → 3.2s on the Pub dashboard.
- Ran bi-weekly dev syncs and mentored three engineers into senior roles.

2014 — 2017
Earlier Experience
Gurgaon · Delhi · Lucknow

Frontend Engineer — first three years

- **Onlinemocks** — Owned the web mock-test portal end-to-end — built it and tuned it for scale.
- **Collegedunia** — Shipped the core college-listing pages, then revamped zoutons.com end-to-end.
- **Rising Hues** — First job out of college — built marketing sites and internal tools with HTML5, CSS3, and vanilla JS.

Skills

Frontend

- React
- TypeScript
- Next.js
- Tailwind
- Node.js
- React Query / SWR
- Storybook

AI, testing & perf

- Claude SDK
- MCP
- AI-SDK
- React Testing Library
- Lighthouse / DevTools
- Sentry / Heap profiling
- Vite / Webpack
- Figma
